WE ARE ON A MISSION FROM GOD !!!

INTRODUCTION TO THIZ WONDERFUL MAGAZIN

Hello folks and readers, this is the preview issue of the new mag. BRAINFART
The idea to do a mag came to us when we heared that the Bullet Proof died.
There are too much mags in da scene, but there aren't enough
papermags, so we came to the conclusion: WE do a good papermag.
Ok, now to our aim: Our aim is to make a good and interesting mag.
But we want to do it a bit different, not this usual news, charts and addy crap,
surely we also have this chapters in our mag. but there are so many other interesting
things to read. Mainly our aim is to entertain you, so don't take all things too serious

This mag is produced under the trademark of PARALYZE.

The main editors are: T.G.I of PARALYZE and DODGER of PARALYZE

We hope that we managed to do a votesheet in this issue, if it's included in this mag,
please copy it to DINA4 and spread it worldwide, cause we need votes and news for the
next issue. And remember that this issue is a preview issue, you get it for free !!!
(please spread this issue !) if you want to get the 1st 100% issue send 2.00DM to us
and we will send the mag. Please help us to get papermags as popular as discmags, or do
you want that the other papermags die like Bullet Proof ??? I think you don't want this, so
help us!

Another fact: We have to say a big 'thank you' to the ultimate DENSE/RSI/SPIRIT, who
supported us by doing this mag. THANK YOU DENSE !!!

Some other thanks must go to: DOC/TCS (for teaching me in this fucking PC proggy !!!)

So readers if you want to write a chapter for us or if you have something to be published
in BRAINFART, or if you just want to ask some questions then write to:

-don't vote for yourself,or for anybody else of your group
-please think before voting !

send this votesheet back to the staff or to any other member of Paralyze

This time we haven't got any addies except ours, cause this is the preview issue !!!

But we want to explain how your addies have to look like.

Please do your addies in this format:

10,5cm (length),5cm (high)

And do it in a graphical and funny way.

For example do a little man showing your needs (swap,covers etc) standing in front of your addie.Maybe you ask yourself WHY ?

There is only one reason:We want to do a funny and other styled mag,so we do a graphical advertising !

TCC`93-Party

OK,fellas you reached the report chapter already,so i will tell you about our trip to swedens biggest party held by Light and some amiga crews.Ok,let`s begin with the story:It all started on a bloody cool day,it was cool weather,cool mood.As i had already packed my laguage i waited for my friends to come (some amiga freaks) i waited and waited but nobody came and i thought `shit happens`. Argh,there they were,i was really happy ,and carried my stuff into the car.The journey began,first we had to travel by car to KIEL and then we had to travel by ferry to GOTHENBURG.

In the car nothing special happend ,only this lame amiga crap (Hi dragon and cyx) but as we arrived in kiel we had to enter the ferry and that was not so simple as i thought,cause i had the monitor fixed to my skateboard(because of better carriage) but that was wrong,cause i always had to carry both skateboard and monitor,that was fucking lame. Ok,now we were in this large ferry (we had no cabin !!!) and there were so much cool things to watch,like videos,discos,and a lot of amusements. But we just hang arround to fake some folks.

Nothing special happend ...
At the next day we arrived in Gothenburg and we thought we could go by feet to the party. That was a fault (we walked through whole Gothenburg)so we decided to take the official transport system. Ah,there was a big building,the swedish exhibition centre so we walked towards it,but there were no party-activeties ,ah,we recognized a sign showin TCC 150 m .

So we walked 150 meters and there was the party place. As we arrived there were almost no C64 there so i did a little logo on amiga and waited that more 64sceners arrive. After 2 Hours i recognized the Oxyroners and we decided that i take my equipment with me to their place.As we had build the whole C64 castle,more and more arrived at the party,like Red Sector,Topaz ,Trance and lots of

more .As i brought my C64 with me i thought i could take part at the graphics compo,but the whole Oxyron crew blocked my keyboard the whole time,so i did nothing xtremly special (Hi RRR).After some faking with luka,peace,death,dense(HI) i went to sleep ,argh the sleepinghall wasn`t as good as promised but it worked aswell.Next day i was a bit sick but it was over after half the day.Nothing special happend,only the things like: talking,painting etc...Ah one abnormal thing was there:there were swedish nazis shouting Heil Hitler ,isn`t it stupid ??? FIGHT FASCISM !!!
As the competitions were over we traveled to the ferry .As we went on it we saw Double T(rsi) Dense(rsi&spirit) Argos(sunrise) together with these funky guyz we decided to connect our computers to the electricety,and so we did ,we put our stuff under the stairs and played Dynablaster (amiga)and Rally Speedway(C64).
All in all it was a cool journey `cause cool releases cool guys and a lot of fun !!!
Hope to see u all at Camelot 93

These funkies are Biz Kid, Axis and Machine of Oxyron.

Mr. Mister/Trance, Argos/Sunrise and Aslive (he's working !!!)

Dense/RSI/Spirit playing Baseball at da ferry.

Booze Design, the longhaired is HCL.

Double T of RSI sleeping at the journey back home.

ACTIONS

Imagine this:

You get a letter from a nice girl who ask you to copy her some games, 'cause she hasn't got any money to buy them. You, friendly as you are, send some discs with good stuff to her, after some weeks you recieve an answer, not from her but from the lawyer of a software company, who tells you, that you must stop copying these proggys. there are also some costs: about 1100 DM (about 650 \$)!!!. There is nothing to do about it, you got to pay it. now think about a guy going to school, how should he pay this ?

I don't think this is the way how this law was meant to work, but what could we do ? The only chance is to put it into the mind of some politicians.

Our idea is that the whole scene works together.

In the next BRAINFART™ issue a letter will be published which should copied to all guys you know.

It just got to be signed and put into an envelope addressed to the german parlament, there, every letter will be copied and given to every member of the parlament, could you imagine what happens if 2000-3000 sceners send this letter over there ?

There might be some peoples there who are interested in that if they get some thousands of letters...

DODGER

Hello fellas take these stickers and be happy,

Shadowrun-the world of 2050

THE BACKGROUND:

At the 24th of december 2011 magic came back to earth and with this magic also creatures like dragons and orks reappeared. During this time the connection of mankind and technic came complete and big concerns got so powerful that they are in fact the rulers of earth, so you are the ones who run through the shadows of them, for a bit of money or information.

THE RULES:

Shadowrun consists out of many rules, it isn't one of those games you can perfectly play after reading it once, but when you know it by heart it is great to play. There is only one problem, it's fucking bad explained, half the time of learning is used for guessing how things are meant. Except from this reading Shadowrun is great fun, it's as if you were reading a great science fiction book.

Buy it, play it. It's more than worth it!

THE RATING:

Rules: 83%, Gamefun: 90%, Story: 97%
Explanations: 46%, Reading fun: 89%
Price: 85%, OVERALL: 85%

RATING RULES:

- 0-10% Burn the book and kill the author
- 11-20% One of those
- 21-30% Might use it as toilet paper
- 31-40% If it has a good cover, rip it off
- 41-50% You might play it once or twice
- 51-60% Worth playing
- 61-70% Cool game
- 71-80% Great game
- 81-90% Greeaaaat game
